Precision Hydraulic Components

Hydraulic applications that include Piston, Vane, Gear pumps bearing, valve, retainer plates in both Bi-metal & Heat treated steel materials.

Materials:

We are able to provide a wide range of steel backed bronze layered material as well as specialized steels and heat treatments to your engineering specifications. Because all Bi-metal manufacturing processes are performed in house we are able to control the exact quality and cost to the final products.

Manufacturing processes:

Our technical capabilities allow us to provide our customers with a total turnkey solution that can be scaled to match your exact requirements for either blank, semi finished or complete finished product. Each of our processes are done in-house and overseen by experienced staff who knows what it takes to make a high quality part. Processes include:

- Progressive Die Stamping, Fineblank, Precision Stamping
- Double-Disc Fine Grinding, Final Lapping, Blanchard Grinding
- CNC Machining (turning and milling), Deburring
- Continues & Sheet Bi-metal Sintering, Heat Treatment

Certified flat:

Our in process and final inspection utilises high resolution state of the art equipment that allows us to accurately measure a wide range of surface finishes and material types.

We can guaranty that our manufacturing processes will meets your flatness and surface requirements!

Engineering:

Our engineering team will support you through every step of product development- from concept through final production and service after sale- becoming an extension of your business.

Distribution:

Fullco has shipping options from all of our global locations, including our Headquarters in Sycamore, IL as well as our branches in Nuneaton, UK and Kunshan, China.

We also offer tailored Vendor Managed Inventory (VMI) programs to fit your needs, including on-site consignment, Kanban or stock and release programs.
